

Policy and Procedure

McMinnville Free Clinic

Policy on Abortion

Last Board Review Date: _____

Last QA Review Date: _____

Initial Approval by Board: June 1, 2017

The following represents the policy of the McMinnville Free Clinic ("Clinic") regarding the question of pregnancy and abortion:

- The Clinic will support patients who ask for help to prevent pregnancy, including supplying condoms and writing prescriptions for contraception.
- However, once conception has occurred, the Clinic will not advise or participate in any way to interrupt or terminate a pregnancy, including writing prescriptions for "day after" drugs for use after conception.
- The Clinic Community Resources volunteers will offer resources to patients who need support during pregnancy and after the birth of a child.
